

NEW COLLEGE OF FLORIDA

Statement of Priorities for 2008-09

As proposed by Gordon E. Michalson, Jr., President

Continue the current integrated strategic planning process based on a commitment to sustainable practices that will serve the College well for decades to come; mobilize the planning process in a way that will assure the reaffirmation of the College's accreditation by the Southern Association of Colleges and Schools

Take advantage of recent and pending transitions within the College's fundraising organizations to enhance private giving, including major gifts on a scale appropriate for the naming rights of new campus buildings

Continue to pursue campus pluralism in order to encourage human diversity in our campus population, curriculum, and outlook; promote international awareness through support of curricular and programmatic initiatives designed to increase foreign study and travel opportunities for students and faculty

Implement plans for the celebration of New College's fiftieth anniversary; exploit the opportunity provided by this anniversary to increase the campus community's sense of shared purpose
