FACT BOOK  
2001-2002**

**New College of Florida**

## INTRODUCTION

The *New College of Florida Fact Book, 2001-2002* provides current data on students and the academic program at the eleventh member institution of the State University System of Florida.

The *Fact Book* follows the format established by the Common Data Set widely used by college guide publishers for gathering data on undergraduate education, particularly the year's fall entering class. By standardizing the definition of key terms, the Common Data Set helps assure that data will be comparable across institutions.

The Table of Contents lists each table by title. In a few instances, a group of closely related tables appears in the Table of Contents under a single heading. Tables added to the Common Data Set by New College are asterisked. These tables capture information useful to the College and sought by particular constituencies.

For the most part, the *Fact Book* omits narrative information about New College that is readily available in other College publications. A listing of selected sources on New College, with the offices that publish them, is found on page vi.

Special thanks this year to Jim Feeney, the original *Fact Book* editor, who returned to oversee most of the production of this year's edition, and to Stela Krasteva-McCauley, New College '01, who produced the volume you see here.
