

New College of Florida Campus Hazing Transparency Report

New College of Florida has zero tolerance for any form of hazing within our community. All students and recognized student organizations, student groups as well as employees, volunteers, alumni and consultants of New College of Florida are prohibited from engaging in hazing behavior. Hazing causes significant and lasting harm to victims, their families and the community. An anti-hazing mindset and the prevention of hazing is therefore a shared responsibility of the entire NCF community, including our students, faculty, staff and alumni.
